

# Wymagania, które musimy spełnić:

- a) wymagania funkcjonalne
- b) responsywność
- c) grafika i wygląd
- d) Jakość kodu
- e) walidacja HTML i CSS
- f) użyteczność
- g) testowanie

Na następnych stronach postaram się zawrzeć dowody na to, że zadane wymagania zostały przez nas spełnione.

Jak widać na poniższych screenach nazewnictwo klas, zmiennych staraliśmy się utrzymać w największym porządku, komentarze ograniczyliśmy do poj. liniiek i uzupełniani PHPDoc'a.

Dzięki tym zabiegom kod stał się naprawdę czytelny i wygodny w użyciu.

```

    * @param $id
    */
    public function actionDelete($id)
    {
        $model = Events::model()->findByPrimaryKey($id);

        if ($model->isOwner() || User::getType() == 1) {
            $model->delete();
            $this->redirect(url: '/events/index');
        } else {
            $this->redirect(url: '/events/index');
        }
    }

    /**
     * Renders site/index with calendar view
     */
    public function actionIndex()
    {
        $this->render( view: 'index', array('provider' => Events::findAllProvider()));
    }

    /**
     * Performs the AJAX validation.
     *
     * @param Events $model the model to be validated
     */
